Summary

A software developer with experience leading teams in system design, coding in multiple languages, debugging and deploying, who enjoys the collaborative nature of well executed projects, always looking for "+1" opportunities to exceed expectations.

Skills

Leading:

- Software Architectural design
- UI/UX design & development
- Agile Scrum DevOps as Scrum Master
- Testing & debugging
- Deployment

Languages & Frameworks:

- HTML, CSS, JavaScript, TypeScript, jQuery, SCSS, Bootstrap & Materialize
- PHP, nodeJs, & SQL
- MERN & MEAN stack
- Angular, React, & Vue
- Laravel, CodeIgnitor

Other Software:

- Adobe Photoshop, InDesign, Illustrator, XD
- Microsoft Word, Excel, Access, PowerPoint, Visio
- Crystal Reports, Chai, and Mocha.
- Github, BitBucket, Jira
- Google Cloud, CircleCI, cPanel

Experience

Projects

- Director of Web Development -Lead multiple teams of programmers in software architectural design, programming, testing, debugging, and implementation of web based software with database integration utilizing Agile Scrum, with Jira. - Clermont, FL
- Built web solutions implementing modern web programming tools and libraries to create a compelling user experience with powerful functionality on the back end using MERN, MEAN, & LAMP stack, PHP, and databases. - Orlando, FL
- Built system simulators utilizing object-oriented programming techniques and patterns to provide easy reconfiguration of system elements for optimizing systems before engineering. This significantly reduced design-time and provided rapid proof of concept models for clients. - Birmingham, AL
- Designed and programmed solutions for data input, manipulation, and reporting including database design, integrating existing information from multiple sources, such as spreadsheets, csv, and relational databases (Access, SQL, and Oracle) and providing a user interface that allowed for 'on the fly' data reporting and visualization in a real-time environment - Memphis, TN

Work

Director of Web Development, myGSPN and GamerAction Clermont, FL (July-2019 - June-2020)

In addition to continued Full Stack development:

- Responsible for leading a team of in-house and remote developers in Agile Scrum development utilizing Jira Software.
- Responsible for directing development of websites, mobile apps, and internal software.
- Responsible for overall software architecture, and wrote extensive code in Angular and Laravel frameworks.

Full Stack Web Developer, myGSPN Clermont, FL (October 2018-June-2019)

- Rapid design custom software and web sites using UX/UI methodologies wireframes with Adobe XD, Photoshop, and Illustrator
- Designed database schemas and data architecture, including documentation.
- Create web pages in Angular utilizing multiple libraries, including Bootstrap and Materialize
- Lead team meetings with management, and the software team's design and development.
- Develop RESTful APIs, messaging and notification services, and other backend solutions in CodeIgnitor and Laravel in PHP.

Lead Programmer, Roskam Robotics Birmingham, AL

- Designed software solutions for industrial applications
- Led development teams using Agile, SCRUM, and UML modeling
- Wrote software documentation and user guides and taught training classes
- Worked with vendor and partners to develop full turn-key solutions for clients

Education

University of Central Florida – Full Stack Web Development Certificate
Samford University - BA
